CONTENTS

Argument /XXV

Introduction /XXIX

Part I

The Fundamentals of strategy /1

Chapter 1.

Strategies /3

- 1.1. The concept of strategy / 3
- 1.2. From the military strategy to the business strategy /24
- 1.3. The types of strategies from the perspective of development processes /30
 - 1.3.1. Deliberate strategies /31
 - 1.3.2. Emergent strategies /33
 - 1.3.3. Realized strategies /44
- 1.4. The types of strategies from the point of view of adapting to the environmental conditions /48
- 1.5. The content approach and the processes approach /50
- 1.6. H. Mintzberg's critic regarding defining the strategy exclusively on planning /52

Chapter 2.

Strategic segmentation- fundament of strategic analysis /57

- 2.1. The concept of strategic segment /57
- 2.2. Strategic segmentation and the rules that are at the basis of it /58
- 2.3. The stages of the process of strategic segmentation /60
- 2.4. The methods of strategic segmentation /62
- 2.5. The criteria of strategic segmentation /65
- 2.6. The differences between strategic segmentation and marketing segmentation /71
- 2.7. The usefulness and limits of strategic segmentation /76

Chapter 3.

The strategic process /81

- 3.1. The nature and the stages of strategic process /81
- 3.2. The analysis of the current strategy and of the economic and financial situation of the company /89
- 3.3. Generating alternative strategies /94
 - 3.3.1. LGAC Model /94
 - 3.3.2. I. Ansoff model /99
 - 3.3.3. The Model „Capitalization of stock. McKinsey Pentagon” /108
 - 3.3.4. Sicard Model /109
 - 3.3.5. The Benchmarking- indirect method of formulating strategies /113
- 3.4. Criteria for analysing strategic alternatives and choosing the optimal strategy /118
 - 3.4.1. Criteria for assessing strategic alternatives /118
 - 3.4.2. Choosing the optimal strategic policy /128
- 3.5. Implementing the strategy adopted /134
 - 3.5.1. The role of achieving the strategy in the strategic process /134
 - 3.5.2. The nature of the changes that take place in a company as a result of the strategy's achievement /137
 - 3.5.3. The fields where the strategic changes occur /138
 - 3.5.4. The tools used in implementing the strategy /140

Chapter 4.

The tools used in implementing strategic decisions /147

- 4.1. The competitive advantage /147
 - 4.1.1. The nature of competitive advantage and its components /147
 - 4.1.2. Theories of the sources of competitive advantages /154
 - 4.1.2.1. The theory of competitive position in the sector: generic advantages /155
 - 4.1.2.2. The theory based on resources /157
 - 4.1.2.3. The theory „value disciplines” /172
 - 4.1.3. The sustainability and the erosion of competitive advantages /173
 - 4.1.3.1. The sustainability of competitive advantage /173
 - 4.1.3.2. The erosion of competitive advantages /176
- 4.2. The experience curve and its strategic implications /181
 - 4.2.1. The concept of experience effect and the relation experience effect/ unit cost of production /181
 - 4.2.2. The mathematical formula of experience curve / 190
 - 4.2.3. The causes of the effect of experience / 191
 - 4.2.4. The conditions of verifying the law of experience /197

- 4.2.5. The strategic implications of the experience curve /198
- 4.2.6. The limits of the concept „experience curve” and the dangers deriving from it /207
- 4.3. The chain of value-source of competitive advantage /215
 - 4.3.1. Defining the concept value chain /215
 - 4.3.2. Identifying the value chain of the enterprise /218
 - 4.3.2.1. The classification of the activities that create value /218
 - 4.3.2.2. Establishing the relevant activities in a chain value /225
 - 4.3.2.3. The analysis of the links within the value chain /225
 - 4.3.3. Using the value chain in establishing the sources of competitive advantage /227
 - 4.3.4. The strategic implications of the value chain /229
 - 4.3.5. The advantages and limits of the value chain /231
 - 4.3.6. The influence of information technology on the value chain /233
 - 4.3.7. The value system /237
 - 4.3.7.1. The concept of value system /237
 - 4.3.7.2. Choosing the links in the value system - a problem of strategy /238

Part II

The classification of the strategies according to the levels of their development /241

Chapter 5.

Presentation of the levels of generating strategy /243

- 5.1. Hierarchical levels and their incumbent responsibilities regarding the formulation of strategies /243
- 5.2. The corporate level strategies /247
- 5.3. Business level strategies /251
- 5.4. Functional strategies /255
- 5.5. Operational strategies /258

Chapter 6.

Strategies at the corporate level: corporative strategies /259

- 6.1. Corporate strategies in a multi-unit strategic business company /259
 - 6.1.1. The concept of portfolio of activities /259
 - 6.1.2. The analysis of the portfolio of activities /261
 - 6.1.3. Generic matrix of the activities portfolio /263
 - 6.1.4. The management of the portfolio of activities /266

- 6.1.5. The advantages and disadvantages of the matrix of analysis of the portfolio of activities /273
- 6.2. The matrices of analysis of the portfolio of activities /277
 - 6.2.1. The matrix market growth rate/relative market share (BCG matrix). The variables and underlying assumptions of BCG matrix /278
 - 6.2.1.1. The stages of using the BCG matrix /285
 - 6.2.1.2. The features of the strategic areas of activity, their relations to the resources and needs, market shares, growth rates and nature of net flows of funds /291
 - 6.2.1.3. Formulating strategies based on positioning /300
 - 6.2.1.4. Dynamic analysis of the portfolio of activities in the BCG matrix /305
 - 6.2.1.5. The usefulness and disadvantages of using the BCG matrix /309
 - 6.2.2. The new model of BCG matrix: Volume - differentiation matrix: competitive systems. The characteristics of the matrix and competitive systems /321
- 6.3. Multi-criteria analysis methods /331
 - 6.3.1. The matrix attractiveness of the sector / strengths (competitive position) – GE -McKinsey matrix /333
 - 6.3.1.1. Restructuring of the company General Electric /333
 - 6.3.1.2. The variables of the GE-McKinsey matrix /334
 - 6.3.1.3. The stages of using the GE-McKinsey matrix /335
 - 6.3.1.4. The usefulness and limits of using the GE-McKinsey matrix in formulating strategies /351
 - 6.3.2. The A. D. Little matrix (ADL matrix) /356
 - 6.3.2.1 The variables of the ADL matrix /356
 - 6.3.2.2. Using the phases of the life cycle of the activity in formulating strategies recording ADL matrix /359
 - 6.3.2.3. The relationship between the competitive positions, the level of maturity of the sector and the financial situation in the ADL matrix /362
 - 6.3.2.4. The advantages and limits of ADL matrix /367
 - 6.3.3. PIMS Model (Profit Impact of Market Strategies) /369
 - 6.3.4. MACS Model (Market Activated Corporate Strategy) /376
 - 6.3.5. The matrix parenting mix (parenting mix) /379
 - 6.3.6. Ashridge Matrix /381
 - 6.3.7. The matrix resources/markets (the matrix Hamel – Prahalad) /383
 - 6.3.8. The matrix „fundamental skills/markets” /385

- 6.4. Technologic matrix /387
 - 6.4.1. The integration of technology in the analysis of portfolio and its impact on competitive situation /387
 - 6.4.2. The diagnosis of the technological situation of the company /391
 - 6.4.2.1. Technological patrimony /391
 - 6.4.2.2. The competitive typology of technologies /392
 - 6.4.2.3. Types of technological matrix /393
 - 6.4.2.3.1. The matrix „competitive impact of technology”/the level of awareness of technology (the matrix Stanford Research Institute) /393
 - 6.4.2.3.2. The life cycle of technologies /395
 - 6.4.2.3.3. The strategic management of technology according to R. Foster’ s view /398
 - 6.4.2.3.4. The predicting of development of technologies /399
 - 6.4.2.3.5. Technology strategy formulation and selection /400
 - 6.4.2.3.6. The matrix „competitive position- technological position. Choosing technological strategies /405
 - 6.4.2.3.7. The method of „technological trees” /409
- 6.5. Technological grapes /411
 - 6.5.1. The concept of technological grapes /411
 - 6.5.2. Harrows technological contribution in formulating the company’s strategies /416
 - 6.5.3. Tridimensional analysis /417
 - 6.5.4. A global model of strategic options that integrates technology /418
 - 6.5.5. Two ways of having a technology: „to make” or „to buy” /419
 - 6.5.6. Conclusions related to the relationship between technology and strategy /422

Chapter 7.

Strategies at strategic business unit’s level (UAS), strategic domaine of activity (DSA) /425

- 7.1. Competitive strategies /425
 - 7.1.1. The nature of competitive strategies and the rules to observed in developing such strategies /425
 - 7.1.2. Generic strategies /429
 - 7.1.2.1. General aspects /429

- 7.1.2.2. The cost leadership strategy /433
 - 7.1.2.2.1. Content and field of implementation /433
 - 7.1.2.2.2. The advantages, limits and risks of the cost leadership strategy /439
 - 7.1.2.2.3 Ways of dealing with business, using the cost leadership strategy /444
 - 7.1.2.2.4. Pricing cost leadership strategies /446
 - 7.1.2.3. Differentiation strategy /449
 - 7.1.2.3.1. Content areas, sources and opportunities for differentiation /449
 - 7.1.2.3.2. The link between the differentiation strategies and organizational skills /465
 - 7.1.2.3.3. The advantages, limits and risks of differentiation /466
 - 7.1.2.4. The focus strategy or niche specialization /471
 - 7.1.2.4.1. Content, forms and situations when it is used /471
 - 7.1.2.4.2. The advantages, limits and risks of the focus strategy /474
 - 7.1.2.5. The synthesis of generic strategies /476
 - 7.1.2.6. The strategy of optimal costs /477
 - 7.1.2.7. The distinctive features of generic strategies /479
 - 7.1.2.8. Getting stuck on the middle way /480
 - 7.1.2.9. Align the enterprises' functions to competitive generic strategies /485
- 7.2. Adaptive strategies /487
 - 7.3. The life cycle of an activity, sector /491
 - 7.3.1. The concept and the stages of the life cycle of an Activity, sector /491
 - 7.3.2. The usefulness of the lifecycle of an activity /507
 - 7.3.3. The critic of the model of the sector's lifestyle /509

Part III

Ways of strategic development /511

Chapter 8.

Ways of companies' development: internal growth and external growth /513

Chapter 9.

Ways of internal growth /525

- 9.1. Expansion and diversification strategies: Ansoff Matrix /525
 - 9.1.1. Market penetration strategy /527
 - 9.1.2. Product development strategy /529
 - 9.1.3. Market development of new strategy /532
 - 9.1.4. Diversification /534
 - 9.1.4.1. The concept of diversification /534
 - 9.1.4.2. Factors that plead for diversification /536
 - 9.1.4.3. Forms of diversification /538
 - 9.1.4.4. Strategies depending on the contribution of the added work to the development of the strategic problem /549
 - 9.1.4.5. Methods of measuring the degree of diversification /550
- 9.2. Creating a new autonomous division (internal new venture) /551

Chapter 10.

Ways of external growth /553

- 10.1. Strategic alliances /553
 - 10.1.1. The concept of strategic alliance. Features of strategic alliances /563
 - 10.1.2. The factors that influenced over time the forging of alliances /563
 - 10.1.3. The relationship number of allied enterprises organizational skills /564
 - 10.1.4. The strategic objectives of alliances /568
 - 10.1.5. The types of strategic alliances /579
 - 10.1.6. Portfolio of alliances /581
 - 10.1.7. The reasons for which enterprises sign alliances /587
 - 10.1.8. The rules that have to be respected for the alliance to succeed /591
 - 10.1.9. The advantages of alliances compared to the advantages of other forms of external development /594
 - 10.1.10. Drawbacks, limitations and risks of strategic alliances /603
- 10.2. Partnerships /603
 - 10.2.1. The concept of partnership /603
 - 10.2.2. Types of partnerships /603
 - 10.2.2.1. Symbiotic partnership /603
 - 10.2.2.2. Impartation partnership /605
 - 10.2.2.2.1. The risks of the impartation partnership /610
 - 10.2.2.2.2. The main forms of impartation partnership: subcontracting, counterpoises /611
